PROFILE

Software Developer & AI Specialist and Master's student in Data Science, AI & Digital Business at GISMA University (Potsdam), with 3+ years of experience across mobile app development, backend systems, and data-driven solutions. Skilled in Python, Machine Learning, AWS, GCP, and Snowflake, with hands-on expertise building scalable data pipelines and ML applications, and a track record of shipping production apps to the Play Store and App Store.

ADDITIONAL INFORMATION

Eligible to work in Germany: Student visa with work permit **Willing to relocate:** within Germany

PROFESSIONAL EXPERIENCE

Weco Service GmbH

Software Developer & AI Specialist

04/2026 – Present

Potsdam, Germany

- Built a React + FastAPI Employee Management CRM that replaced an Excel-based workflow for 500+ employees, with full CRUD, bulk assignment, shift scheduling, payroll, attendance tracking and global search.
- Integrated an AI assistant panel powered by the Claude API to query employee data and automate routine HR/operations tasks.
- Developed an automated job-matching dashboard using the Apify LinkedIn Jobs Scraper API, scoring and ranking European IT/AI roles against a defined skill set.

Tech Stack: React, TypeScript, FastAPI, Python, Claude API, SQL

JMR Infotech

Software Consultant

01/2025 – 05/2025

Bangalore, India

- Developed and optimized cross-platform mobile apps using Flutter and React Native, improving load speed by 35% through code optimization.
- Collaborated with backend and data teams to implement usage-analytics dashboards and automate app insights.
- Deployed applications to Google Play & the Apple App Store and integrated CI/CD for faster delivery cycles.

Tech Stack: Flutter, React Native, Firebase, REST API, Oracle

Dynamic Method Solution

Software Developer

06/2023 – 01/2025

Ahmedabad, India

- Led development of production-grade apps (Pizzaiolo, Triumph, ODC, Attitude App) using Flutter and React Native.
- Managed Android/iOS support, maintenance and feature rollout through Jira, Apple and Google Developer accounts.
- Pizzaiolo achieved over 20,000 downloads in Canada across the Play Store and App Store.
- Implemented CI/CD pipelines and automated testing, improving release speed by 20%.

Tech Stack: Flutter, React Native, Firebase, REST API, Android Studio, SQL

Leeway Softech Pvt. Ltd.

Mobile Application Developer

09/2022 – 05/2023

Bhavnagar, India

- Developed and maintained scalable mobile applications with Flutter (Dart) and managed SQL-based servers.
- Deployed applications with high performance and reliability; awarded Best Developer for project excellence.
- Integrated APIs and optimized backend communication, improving data-flow efficiency.

Tech Stack: Flutter, Firebase, MySQL, GitHub

Phoenix IT Park

Python Developer (Internship)

01/2021 – 06/2021

Ahmedabad, India

- Created E-Medicare, a healthcare app in Python (Kivy) and MongoDB.
- Implemented patient-data management and appointment-scheduling modules.

Tech Stack: Python, Kivy, MongoDB

EDUCATION

M.Sc. Data Science, AI & Digital Business

GISMA University of Applied Sciences

2025 – Present

Potsdam, Germany

M.Sc. Information Technology

Maharaja Krishnakumarsinhji Bhavnagar University

2019 – 2021

India

B.Sc. Information Technology

Maharaja Krishnakumarsinhji Bhavnagar University

2016 – 2019

India

KEY SKILLS

Data Science & AI

Python, Pandas, NumPy, scikit-learn, TensorFlow, Predictive Modeling, Data Visualization, Power BI

App & Backend Development

Flutter, React Native, React, FastAPI, Firebase, REST API, MySQL, MongoDB, CI/CD, GitLab, SQL, Oracle

Soft Skills

Analytical Thinking, Problem Solving, Team Collaboration, Proactive Learning Mindset

Data Engineering & Cloud

AWS, GCP, Snowflake, Data Pipelines, Data Analysis, SPSS

Tools

Jupyter Notebook, GitHub, VS Code, PyCharm, Android Studio, Power BI

Languages

English (Fluent), German (B1), Gujarati (Native)

CERTIFICATIONS

Data Science with Python

Simplilearn

Analyzing & Visualizing Data with Power BI

PwC

React Native

Udemy

Generative AI

LinkedIn Learning

Python

HackerRank

Digital Marketing

Google

PROJECTS

Automotive Component Detection — Master's Dissertation · YOLO / Computer Vision

Built and evaluated YOLO object-detection models across 50 automotive component classes, with detailed per-class failure analysis, confusion-matrix evaluation and Grad-CAM explainability in a fully reproducible Python/PyTorch pipeline.

Student Placement Prediction — Kaggle Dataset

Classification model in Python (scikit-learn) predicting placement outcomes from academic metrics; Pandas preprocessing and Power BI performance visualization.

Sales Market Analysis — Kaggle Dataset

Analyzed sales data with Python and scikit-learn to surface market trends and seasonal patterns; optimized regression models and presented insights via interactive Power BI dashboards.

Food Waste Hotspot Prediction — Eurostat Data

End-to-end project collecting, cleaning and merging Eurostat datasets; feature engineering and model evaluation (Grid Search, AUC, F1-score, cross-validation) in SPSS with Power BI visualization.

Pizzaio! — Canada · React Native & Firebase

Cross-platform restaurant app with real-time order tracking and notifications; achieved 20,000+ downloads in Canada.

Sports Event App — Saalebulls, Germany · Flutter

Flutter-based event ticketing app integrated with Firebase analytics and data tracking.
